

McQUEEN

Widely Variant Stories Told by Detective Murphy and the Alleged Accomplices of the Pantano Train Robbers—Not Done Yet.

A large number of people were present yesterday at the preliminary examination of Al McQueen, supposed to be implicated in the train robbery which occurred last April on the Southern Pacific near Tucson.

The defendant was present with counsel, G. G. Adams and C. C. Stevens. United States District Attorney Brooks for the government.

The arrest of McQueen was made by C. L. Murphy, the complainant and at that time Deputy U. S. Marshal, at National City about ten days ago. Mr. Murphy is a resident of Tucson, where he has been a member of the police force and also served a term as coroner. He was also chief of police at Stockton for a year. After the robbery had been committed and on account of the large rewards offered he started out to work up the case, working independently, stating the matter thus:

Before leaving Tucson I knew of McQueen and another person having attempted to purchase giant cartridges, and had later reasons for thinking he had some connection with the robbery. Went to National City where McQueen was working, and went to work as a laborer for the California Southern Railroad Company in order to watch him. I worked there sixteen days. In the early part of July I was standing at the postoffice, when McQueen came up and asked why I was not with the people that were connected with the train robbery, and that he was discharged from the Southern Pacific Railroad for drunkenness, which I knew was a lie. He was greatly excited and called me a number of hard names. He stated that he could give the names of the robbers, and that he had some of the money in his pocket, and could prove it, and that I could not prove it was not. That he had been wronged by the railroad company, and that he had some of the money in his pocket, and could prove it, and that I could not prove it was not. That he had been wronged by the railroad company, and that he had some of the money in his pocket, and could prove it, and that I could not prove it was not.

At noon an adjournment was taken until 3 p.m.

Mr. Murphy was recalled, and testified that McQueen and another man were riding about town with two fast women one day. He got pretty full, which was found out by Master Mechanic Bonner, who discharged him. As far as I know his reputation in general was not very good. He kept bad company. No, I do not know anything about his honesty and integrity. Never heard any question on this point. Yes, I have heard his reputation questioned, as far as associating with disreputable women is concerned, by several reputable citizens of Tucson. Mr. O'Brien, an engineer, is one. [Mr. Stevens, for defense, here said this was the same man he had defended for murder.

Another man Mr. Bonner, Master Mechanic, who said he was not reliable. No, I was not a sporting kind of a person. I was not a railroad boy to Mr. Bonner when they went to play cards, etc.

JAS. A. McQUEEN testified: I reside at National City. I know McQueen. I became acquainted with him between the 15th and 25th of June, and am a freeman by occupation. I have been working for the California Southern at National City. No, I never talked to McQueen about any train robbery. I heard a conversation between McQueen and Murphy. I think I heard Murphy say, "There is lots of money in this, Al, and you won't lose anything by it." McQueen said, "I am not ready to be shot yet. I have the money in my pocket. I heard him say, I can write down the names of four men who committed the robbery. McQueen accused Murphy of going to San Diego and accusing him of being implicated in the robbery. Murphy denied it and McQueen said you are a liar. Murphy then walked away. Yes, McQueen said something to me about bluffing Murphy, that he was a Jim-crow detective. Murphy had only been there a day when everybody knew what he was after. Murphy said to me, pointing to McQueen, "I used to know the man in Tucson, but don't think he wants to know me."

E. T. Boyle, A. D. Merriam, J. T. Yorba, George Turner, and J. V. Van Kuren, testified that McQueen's general reputation was good. Merriam, Yorba and Turner testified that he was in this city at about the time of the robbery.

AL. McQUEEN testified: I am 33 years of age. I commenced working for the Southern Pacific Company shortly after September 1, 1881. After five years I became an engineer. I did, with a friend, take two girls to Fort Lowell and Silver Lake for a ride. None of us were drunk. Mr. Murphy reported the case to the district attorney on account of it. I received a letter from A. J. Stevens, reinstating me. I was out of work about three weeks. I showed the letter to Mr. Stevens and he wanted me to go to National City and run an engine at the creosote works. The first I knew of Mr. Murphy was at National City. Mr. Porter, at the hotel, told me a man here there to see me the night before. When he described him I knew it was Murphy. That evening I saw Murphy in the postoffice and attempted to pass. He stepped up and said "Hello, old man." He said: "You think I have done you dirt at Tucson, but I have not." I said: "You are a Southern Pacific detective, and was looking up the robbery. I told him he had better go home. I said I knew nothing about it. The next day the foreman told me reports were being circulated that I was implicated in the robbery and had been discharged for drunkenness. I met Murphy the next day and said: "Murphy, I am sick and tired of hearing your lies about me. You told lies about me at Tucson, and now here you are coming here to do the same." I got so mad that I said, striking my pocket, "Murphy, there is some of our Southern Pacific money, no, I don't have only \$25, belonging to Mr. Ferrill. No, I never said I could tell anything about the money. I never said I knew where the money was cached. I have some ideas who touched that train than a child unborn. I know nothing whatever about the money. Yes, I know E. T. Burke, chief of the Southern Pacific, and the Southern Pacific Company. Yes, my attention has been turned to looking up the robbers. Yes, I saw Burke at National City and San Diego. We were closeted together over three hours. Yes, I had been making an effort to get the rewards offered by Wells Fargo and others. Mr. Murphy told me I would come out and tell what I knew I would have the best run on the Southern Pacific. I replied, a man cannot tell what he does not know. I never had any actual difficulty with Murphy at Tucson, still I did not consider him a friend. I was generally concerned among railroad men that he was a robber. I was surprised when I found

Murphy at National City on this business. Yes, I said I wished to talk to Mr. Burke before making any statement. I said I would not give anything away until I had. A. N. Towne of the Southern Pacific road was telegraphed about the robbery by a well-known man. I refuse to mention his name. Mr. Burke came to me and we carried on the business quietly. When Murphy came to San Diego this gentleman said: "Al, I don't want to be mixed up in this case." It was in the office I met Mr. Burke. District Attorney Brooks here asked the name of the gentleman. Counsel for defense objected on the ground that no proof had been established. McQueen offered to give the name of a slip of paper for the Commissioner or District Attorney, but had promised not to make public the name. He did not want the papers to get hold of it. The District Attorney asked for an adjournment until 10 o'clock this morning, when McQueen will be compelled to divulge the name of the gentleman, or be committed for contempt. Mr. Brooks says he has sufficient evidence to warrant McQueen being bound over to the U. S. Grand Jury, which will meet this month.

THE NURSERYMEN.

Election of Officers—Pointed and Sensible Resolutions. The annual meeting of the Los Angeles County Nurserymen's Association was held at the office of the president, T. A. Garey, 115 West First street, yesterday. The following officers were elected for the ensuing year: T. A. Garey, president; A. M. Herbert, vice-president; Byron O. Clark, secretary; Milton Thomas, treasurer. The executive committee of last year was re-elected.

The secretary was instructed to have a report of all nursery stock on hand at the next meeting, to be held at Hazard's Pavilion during the Pomological Fair week, September 15th, at 11 a.m. In motion the following resolutions were adopted: Resolved, That it is the unanimous experience of the members of this association here present that irrigation (with few exceptions) is not necessary for profitable growing of the deciduous fruits on this coast. Resolved, That we view with alarm the inroads of town lot "speculators" on the many fine orchards of this county, which have caused many of the best orchards to become weed patches and hotbeds for the dissemination of scale and other pests, and would urge upon those who subdivide property to provide for the cultivation and care of such property until such time as it may be occupied by the owners, and thus prevent the evils that threaten our fruit industry; and we would especially urge all true pomologists and horticulturists not to fill the goose that lays the golden egg, but take good care of their orchards, as any of our best orchards are worth intrinsically more than the prices which they are often sold for, and we only need to conduct our calling on true business principles to prove them more profitable to own than to sell.

Adjourned to meet at Hazard's Pavilion September 15th, 1887, 11 a.m.

Incorporated.

Articles of incorporation were filed yesterday by the Pacific Coast Brick Company. The company propose to manufacture and sell all kinds of brick, terra cotta and tiles. The directors are G. L. Stearns, R. B. Russell, G. D. Carleton, C. Tassell and J. F. Jackson. Capital stock, \$100,000; amount subscribed, \$50,000.

Marriage License.

A marriage license was issued yesterday to E. H. Willard and Nellie Sprout.

Successful Enterprise.

Every man or woman who purchased stock in the enterprise who are selling the "Old Mission of San Juan" Capistrano, will acknowledge that they never made better or safer investments. The demand for good land is so great that all large ranches that have been offered for sale at a reasonable price will certainly bring to the purchasers an immense return on their investment. The same enterprising gentlemen who are so successfully managing the ranches above mentioned have been fortunate enough to secure 15,000 acres of the best land in the famous Lankershim ranch, in the San Fernando Valley, only eight miles from Los Angeles. This land adjoins the Providence, where land of the same quality is selling at \$200 and \$300 per acre, and is only one and a half miles from the Calhoun foothill land now selling at \$700 to \$1000 per acre. The syndicate who purchased this fine property are about to form a company to own and subdivide and sell this 15,000 acres. The first purchasers of stock will get the land at \$65 per acre by subscribing for the stock at \$100 per share on very easy terms. The sale of stock will begin Tuesday, August 22d, at the office of Byram & Pindexter, 27 West First street, and Burch & Boal, 136 West First street.

The names of Dan McFarland, L. T. Gamsey, S. B. Hunt, S. W. Luitweller, C. J. Ellis, Clifford Evans, R. C. Shaw, F. C. Garbutt, E. A. Forrester and others who are connected with this enterprise are a sufficient guarantee of its good faith and success.

The Highest Authority. William Hammond Hall, the State Engineer, who has been in charge of the land and water in California, after a full examination of the Rancho Ex-Mission of San Fernando, reports to the owners of the property, the Porter Land and Water Company, that "You have 10,000 to 11,000 acres, and perhaps more, of really first-rate valley lands for cultivation, with soils not to be surpassed for fertility and desirability by those of any section; irrigation, where land of the same quality is selling at \$200 and \$300 per acre, and is only one and a half miles from the Calhoun foothill land now selling at \$700 to \$1000 per acre. The syndicate who purchased this fine property are about to form a company to own and subdivide and sell this 15,000 acres. The first purchasers of stock will get the land at \$65 per acre by subscribing for the stock at \$100 per share on very easy terms. The sale of stock will begin Tuesday, August 22d, at the office of Byram & Pindexter, 27 West First street, and Burch & Boal, 136 West First street.

Knows a Good Thing. One of our prominent real-estate dealers, who has carefully examined the Central Park tract, and knows a good thing, says that of the prices and terms, it is good enough for him, and proposes to take a round dozen of the lots at today's sale.

The Population of Santa Ana. Has trebled within a year, and will increase proportionately in the year to come. Buy choice, finely-located lots at the auction there next Tuesday. Information at 111 West First street. A. L. Moye, Manager.

Don't Miss This. And bear in mind that Meadow Park lots at \$50 each, one-half cash balance without interest is for this day only. Moss & Ward 124 North Main street.

"West End Terrace." Fronting on Seventh street, adjoining West Lake Park. The second "Bonnie Brae." Dobson & Fairchild, sole agents.

Buy your lots this week in the McGarry tract, before the advance, from Staunton & Matthews, No. 3 North Main.

Lots nearly all sold in the McGarry tract. A few left at old prices. Staunton & Matthews, No. 3 North Main street.

Call on Ross, Atwater & Co., if you must sell. 10 South First Street.

Santa Ana Auction sale, Tuesday, August 9th.

A FEARFUL FALL.

AN AGED MAN TUMBLES FROM
A FLYING TRAIN.

Between Havana and Lang's Station. He Receives Serious Injuries, Which His Age May Cause to Prove Fatal.

On the arrival of passenger train No. 19 yesterday, word was received that an old man, aged 77 years, was on board suffering injuries sustained by falling off the train when between Havana and Lang's Station. Officer Bob Martin procured a conveyance and brought the sufferer to the police station and Dr. Cole was sent for. On the arrival of the physician an examination disclosed that Mr. Kiseec, the sufferer, had received two ugly scalp wounds, one of them fully three inches long on the frontal bone on the right side, and another over the right ear. The right ear was also cut. He also complained of a pain on the left hip, and also the right side. The old man stated to a Times reporter that early yesterday morning as the train was coming south, and just the other side of Lang's Station, he walked or rather stumbled off the train, and striking on his head was rendered unconscious. He says he suffers greatly from rheumatism, so much so that at times he can hardly walk, but he could not account for having fallen off the train.

Dr. Cole administered a hypodermic injection to alleviate his pain, and dressed his wounds. Kiseec states that he boarded the train at Tehachapi and has a ticket within his possession for Colton. He has one son residing in Tehachapi and another in Wyoming. Chief Skinner telegraphed to Tehachapi to his son. The advanced age of the sufferer counts against him and it will be a long time ere he recovers, if indeed the shock to his nervous system does not prove fatal.

Later in the afternoon he was removed to the County Hospital, complaining mostly from pains in his side.

THE POMONA COLLEGE.

Meeting of the Trustees to Arrange for Incorporation.

The trustees of the new Pomona College held a session yesterday to arrange details of incorporation. There were present H. A. Palmer, H. K. W. Bent, C. B. Sumner, C. B. Sheldon, E. D. Hill, T. C. Hunt, J. H. Harwood and Rev. A. J. Wells. Judge Brunson, who was expected to be present to give legal advice, was absent on account of sickness.

This college, although established under the auspices of the Congregational Church, is to be non-sectarian. It is endowed with money and lands to the value of \$500,000, and its establishment at Pomona is a certainty.

W. R. C. Social.

The ladies of the Stanton Relief Corps No. 16 gave a dime social at their headquarters in the Masonic Hall last evening, and those who were present passed a most enjoyable evening. Mrs. Alice Fitch, the president of the corps, opened the entertainment with a few well-chosen words of welcome, after which the following programme was presented:

Song, "Star of Love," Miss Carter.
Recitation, "Mosses' Water," Miss Williams.
Speech—Comrade Clark.
Song—Miss Carter.
Speech—Comrade Skinner.

Refreshments were then served and the remainder of the evening spent in social conversation.

Runaway.

A horse attached to a light buggy was scared by the wind blowing a piece of paper in his face on South Main street yesterday evening, and he ran away. After running about two blocks he arrived near the corner of Fifth street, and there, in turning south to avoid a street car, the whole outfit was upset, the horse turning completely over on his back. He was unhurt, however, and there being no person in the buggy at the time of the runaway no damage except that to the buggy was done. It will cost the owner several dollars to make repairs, and in the future when leaving his horse standing on the street he will probably see that it is hitched.

A Hard Gang.

Robert Wingate, Jacob Burns and Bessie Wingate, all tramps, the latter a notorious character and probably the only female tramp in the city, got into a fight yesterday in Billy Marlow's saloon, on the corner of Wilmington and Commercial streets. Deputy Constables Fred Smith and A. C. Roberts were called in to arrest the crowd, and a right merry time the officers had in making the arrest. When they finally got through, and had the bracelets on the beauties Smith had a few shreds of clothing left on his back, but Roberts had had his coat and shirt literally torn off him. Justice Austin treated the crowd to ninety days each in the County Jail.

A Fine Street.

The Nadeau Vineyard Land Company yesterday donated a strip of land fifty-five feet wide and extending along the west boundary of their property, for an extension of Santa Fé avenue, through to the south line of their tract. This strip has three rows of fruit trees upon it which will be in the center of the avenue with a drive on either side. The owners of adjoining property will give forty-five feet, thus making the avenue one hundred feet in width. This will be the finest street in the city.

Afrail of Justice Austin.

The cases of the shell game gamblers Big Burns and L. C. Rich came up before Justice Austin yesterday morning, but the defendants instead of announcing themselves ready for trial filed an affidavit to the effect that not believing they could get a fair trial in that court on account of the Court's bias and prejudice, they asked for a change of venue. The cases were accordingly transferred to Justice Taney's court.

A Big Contract.

Bids were opened by the Los Angeles Cable Railway Company yesterday for 50,000 cubic yards of broken rock for use in the concrete in which its whole line is to be laid. Bids were received from Hewitt, Bingham & Porter, for granite; J. H. Leving, granite; Colton, lime and marble; Company, marble, and C. M. Lawrence, sandstone. No decision has yet been reached.

Rooming Vernon.

Messrs. J. D. Bicknell, E. F. Kysor, D. G. Stevens, C. E. Day, F. A. Gibson and E. T. Wright, the owners of Los Angeles and Vernon Street Railway, will push the construction of the same and have the cars running at the earliest possible date. Their magnificent Central Park tract is now on sale. They have placed a telephone at the Kysor residence so that purchasers who select their lots can report the sale to the general agents. Carriages will leave at 10 a.m. and at 2 p.m. daily for the tract, from the station, Day, Hinton & Mathes, No. 8 North Spring street.

Large Lots.

We want everybody to know that the lots offered for sale in the town of CLEARWATER are MUCH LARGER than those in other towns contiguous to the city. Every lot is 150 feet deep, and most of them have a frontage of 100 feet.

California Co-operative Colony, rooms 3 and 4, Newell block.

Bess, Atwater & Co.

10 South Fort street, will give you a bargain at any time, in lots, improved property or acres. Bargains in Pasadena and C. G. C. lands. Call and see us.

Fair Warning.

Meadow Park lots, for this day only, \$50; \$25 down, balance \$5 per month, without interest. Moss & Ward, 134 North Main street.

Magnificent View.

What? Those lots to be sold by Ben E. Ward, August 10th. Twenty cars to Santa Monica. Lots of room.

Real Estate.

LAST DAY
This is Pure Gold!

AT THIS PRICE.

\$50—FIFTY DOLLARS—\$50

BUYS A HOME OR BUSINESS LOT IN

Meadow Park

\$25 down, \$5 monthly for balance until paid, without interest.

MONDAY, AUGUST 8th, WE ADVANCE THIS PRICE.

We propose to give everybody a chance, the poor as well as the rich; the laborer as well as the banker. Most anybody can afford to buy one or more of these beautiful lots and assign it to his or her child and let the future do something for it.

We have seen where parents placed lots and other property this way, and they have made fortunes out of it. Now ponder and act wisely.

WHERE IS MEADOW PARK?

This beautiful townsite lies between San Pedro and Ballona Harbor, four miles northwest of Wilmington and one and a half miles from the Salt Works, five miles from Ballona Harbor, same distance to San Pedro, sixteen miles from Los Angeles and only one mile from the OCEAN, where the gentle seabreeze, toned down by the surrounding hills, makes it a most desirable place to live.

MEADOW PARK today presents more natural advantages to the investor and home-seeker than any other new town in Southern California. MEADOW PARK must be seen to be appreciated. Just think of it! Only one mile to go to catch all the fish you want, and take a dip in the Pacific. Good pure water can be obtained at a depth varying from fifteen to twenty-five feet. Grounds have been reserved for railroads and the right of way granted, connecting with Wilmington and San Pedro. Just as soon as a rail is laid every investor will get \$5 for every \$1 invested.

We shall advance the price before the second payment is paid. Now remember! FIRST COME, FIRST CHOICE.

Apply to the owners,

A GRAND EXCURSION AND AUCTION SALE

Of 173 Choice Lots at Santa Ana,

ON TUESDAY, AUGUST 9, 1887.

Santa Ana now has a population of about 4000 inhabitants. It is by large odds the largest town in a wonderfully beautiful valley. The town now has the biggest kind of a big, big boom. It is as beautiful as it is prosperous. The lots offered for sale are among the VERY BEST residence lots in town. They are covered with the finest of bearing trees, of many varieties, and vines. The A. T. & S. F. R. R. depot will adjoin them, while the S. P. R. R. depot is near. The Long Beach and Santa Ana Railroad, now incorporated, will pass by them. Santa Ana's great "boom" is genuine and permanent. Witness the remarkable character and productiveness of the country surrounding the town.

All of the foregoing facts—and they are facts—combine to prove that Santa Ana will continue to have a great big boom, and that you can accumulate ducats by investing in lots at next Tuesday's auction. A BAND OF MUSIC accompanies the excursion, and you get your dinner, as well as a carriage ride, FREE.

TERMS OF SALE: One-third cash; balance in six and twelve months, with interest at 10 per cent. on deferred payments.

ROUND TRIP TICKETS ONLY \$1.25. This will be the biggest kind of a big excursion, and it will pay you to be there. The excursion train leaves Los Angeles at 9 a.m., sharp, of the day of sale, connecting with Pasadena and other trains, and leaves Santa Ana, returning, at 3 p.m. Obtain tickets and information at

ELECTRO-MAGNETISM,

THE NEW MEANS OF CURE.

DR. E. ROBBINS'S ELECTRO-MEDICAL
INSTITUTE.

Corner First and Spring sts., entrance on First st., is now fitted up, at considerable expense, with everything that is necessary to cure chronic and so-called incurable diseases by the finest electrical apparatuses in the world. Turkish and Russian baths; also Electric, Sulphur and Eucalyptus baths. Dr. Robbins has had several years' experience in the Australian colonies, San Francisco, Salt Lake City, Denver, and five years in Los Angeles; and hundreds of leading citizens can testify to the wonderful effects of electricity in curing cases of chronic diseases when all else had failed, and therefore all persons suffering should try this new remedy before abandoning all hope. After every medical treatment the patients are given the Massage treatment by persons of their own sex. The doctor diagnoses diseases, without explanation from the patient, free of charge. His office hours are from 9 to 12 1/2 to 5 and 7 to 9.

CORSET MANUFACTORY.

Mrs. F. S. GILHAM, who has the largest
Perfect-Fitting Corset Manufactory

ELEVEN Chicago hoodlums convicted at one swoop.

JEFF DAVIS is never happy unless he has put his foot into something. He has now antagonized the Texas prohibitionists.

THE Southern California Christian Advocate starts the ball rolling for the General Methodist Episcopal Conference of 1892 to be held in Los Angeles.

THE Pomona College (Congregationalist) has been endowed in money and lands to the value of \$200,000, and is now a certainty. The Southern California boom believes in education.

THE smallpox still keeps up its lick in San Francisco. One or two fresh cases have been reported within the present week. That would be enough to make it "epidemic" in Los Angeles, in the estimation of the able State Board of Health.

SACRAMENTO has a "boom brigade." It is a fresh production of the Northern Citrus Belt. It is not indigenous to the soil. The seeds were taken from Southern California, where the "boom" grows naturally and with constantly increasing largeness.

W. P. BLAKE, professor of geology at Harvard College, who has been exploring the wonders of California, declares the great Yosemite Valley is simply the bed of an immense glacier, and that ice action only ceased quite recently in California.

THE best way for any section to capture a "boom" is to make itself attractive through general improvements. Sacramento is trying to raise a "boom fund" of \$50,000 for just that purpose, and THE TIMES hopes the will succeed. The Los Angeles boom won't be lessened any by others having a share.

SANTA BARBARA is already beginning to pay the penalty for her boom, consequent upon the approach of the railroad. Hoodlumism is getting daring, and ladies are afraid to go out, as formerly, without an escort, even in the early hours after midnight. An enlarged police force is the remedy required.

THE bill which would send the professors of Atlanta University to the chain-gang for hearing their own children recite in classes with colored pupils, has been favorably reported to the Georgia Legislature, receiving the vote of every white man on the educational committee. It begins to look as if this monstrosity was actually going to be enacted into law.

Two pilgrims from Topolampco, who arrived in this city yesterday, tell a distressing story of the state of affairs existing in that colony. There are fifty men, an equal number of women, and seventy-five children, who are all but starving to death, having nothing but soaked and boiled corn to eat. Many have already perished. There is not even lumber with which to make coffins for burying the dead. Cannot something be done to rescue these perishing people?

A COMMITTEE on shade trees would be a good thing for Los Angeles to have. We want more shade trees along the line of our streets. The new streets which are constantly being opened are generally planted with young trees, but still there is room for thousands more along our principal thoroughfares, and they would add not only beauty to the landscape, but coolness to the atmosphere. There is no one feature which lends such a charm to a city as a multitude of trees.

It would seem that the property-holders of the east side of the river are in earnest about making improvements not only of advantage to themselves, but also an ornament to the city. The Southern Pacific's East Side station will be a great convenience to that neighborhood. Among other public improvements there is to be a boulevard 100 feet wide from First street to the city limits, with trees on each side, making a fine drive; also, a street running from the boulevard to Boyle

The Great Whisky Conspiracy of 1875-76.

This office is in possession of the following letter and the certified transcript therein referred to:

CHICAGO, July 15, 1887.—DEAR SIR: Your favor of the 8th inst. reached me today. I forwarded you by registered mail yesterday the (certified) transcript of record in the Eastman & Golsen whisky case 1875 and 1876. The final disposition of the case you will find in the last two or three pages of the record. When you read the report of the whisky ring as recorded by the papers at the time, you will be astonished at the enormity of the crime and the gigantic conspiracy of the ring that had control, with its ramifications in nearly all the large cities in the country. It was a crime against the Government only second to the great rebellion itself. Never was a ring in more complete control in the perpetration and execution of the crime of defrauding the Government out of the tax on whisky. Involved high Government officials, who violated their solemn oath of office, and received a share of the "booty" of the great whisky ring. The ring was so powerful that the Government itself was taxed to its utmost to break up the ring and punish some of the leaders. In order to do this it had to use the testimony of criminals to convict criminals. The testimony against them (Eastman & Golsen) was dismissed on account of an agreement between counsel that they should "turn State's evidence." (The record shows this was done.) Although the story is a very long one, and the offense was committed many years ago, it is still very interesting reading.

The Eastman named above is Francis A. Eastman, now editor of the Los Angeles Tribune, a person who does not seem to understand the impolicy, not to say danger, of throwing stones while himself occupying a *cosa* of glass. His partner in illicit whisky, William S. Golsen (as the record shows), went into court, taking the firm's account books with him, confessed guilt and made a clean breast of the whole crooked transaction, developing the astounding fact that the firm, which had been in business two years when it was seized by a solid minion (no briber) of the Government, had been crooked eighteen months of that time and straight only six months. The indictment—has twenty-three (23) counts, and it is indorsed: "Indictment a true bill," signed "Samuel Hoard, foreman" of the grand jurors of the United States of America, chosen, reflected and sworn in for the Northern District of Illinois, and acting "upon their oaths."

The transcript is indorsed: "Filed, November 5, 1875. William H. Bradley, clerk." The agreement between counsel, whereby the indictment was dismissed, stipulated that in case the said defendants should divulge the facts within their knowledge as to the alleged whisky frauds, fully and fairly, and turn State's evidence, they should have, among other things, complete immunity from punishment by fine or imprisonment or from any criminal liability on account of any matters set forth in said indictment, or which might appear against them by reason of any disclosures which they might make.

In other words, to quote the language of the world, they "punched on their pals," and were let off.

That is to say, Francis A. Eastman, editor of the Los Angeles Tribune, and once an officer of the United States, turned State's evidence to escape punishment for a monstrous crime against the Government, of which he was indicted by the grand jurors thereof, acting upon their oaths!

Francis A. Eastman! stand up and make answer.

Still Green-Eyed.

And now it is the Express that is worried. Sad to say, this is nothing new. Our more or less—principally less—esteemed evening cotemporary is normally troubled about THE TIMES. Enterprise and prosperity are qualities which naturally make that hybrid sheet wince. Its present: colic is over the wholesale fashion in which it is being "scooped" on news by THE TIMES. With remarkable stupidity—that is, stupidity which would be remarkable in anyone but the Express—it prints a list of eight sensational news items which THE TIMES has had and the Express has missed, within less than a month. Having been "scooped" on these and a multitude of other items, the Express decides them, says they are all fiction, and reads THE TIMES a fearful lecture about puritury.

Now, when the Express can get hold of a dirty sensation it always "whoops it up" to the best of its meager ability, and couches it in such suggestive and purrulent language as would never be admitted to the columns of THE TIMES or of any other respectable newspaper. Readers of the Express will remember, as instances, the Joe Day sensation, the case of the Buena Vista-street girl who was afterward taken to the Demoussett house, several alleged cases of enticement of young girls by Chinese, etc.

If a married woman runs away, or a girl is abducted, it is not a pleasant affair, truly, but it is news; and THE TIMES prints it as news in as delicate form as possible. The Express gets scooped on it and at once begins to howl.

As to the authenticity of these news, the statement of the Express is wholly false and characteristically silly. No hatched-up sensations are allowed in the columns of THE TIMES. The stories are all true, and most of them susceptible of proof. The reporters of THE TIMES are made to understand that truthfulness is as essential as enterprise. That they surpass the reporters of our unhappy cotemporary in both respects accounts for its present hysterics. THE TIMES takes the lead in furnishing all the news. It presents to its readers all the events of the day, good, bad and indifferent. This is a laudable policy which attracts the bad as well as the good classes; and as a faithful recorder of the news, THE TIMES notes evil deeds as well as good. It has always been found solidly on the side of morality and decency, just as the Express has almost invariably been arrayed on the other side. THE TIMES endeavors to prevent crime by exposing it in high as well as low places, by giving warning in advance as well as by denouncing it after its occurrence.

When the Tribune assumes to talk about the terms of the contract be-

GOLD NEAR COLTON.

THE TOWN EXCITED OVER A Rich Strike.

Probable Loss of a Steamer and Sloop with All on Board.

Striking Switchmen Delaying Trains at Port Costa.

Gov. Bartlett Issues a Pardon to a Los Angeles Courier—The California Honey Crop Likely to Be Far Below the Average.

By Telegram to THE TIMES.

COLTON, Aug. 5.—[Special.] Great excitement prevails here over the discovery of gold in the mountains two miles southeast of Colton. The discovery was first made two days ago by Messrs. Slaughter and Wallin, but the fact was not generally known until today.

The ledge varies from twelve to eighteen inches in thickness, and promises well, as saying as high as \$150 per ton. The average is about \$75 per ton. About twenty claims are already taken, and quite a number of men are locating claims tonight by lantern light.

The discoverers are solid business men in whom all have confidence, and the assayer is a man of large experience and undoubted integrity. The find seems genuine and much is expected.

O.

SAN FRANCISCO.

Morrow and McCord Indicted—The Case of Mailhouse.

SAN FRANCISCO, Aug. 5.—[By the Associated Press.] The Grand Jury this afternoon presented an indictment in Judge Murphy's court against James McCord, Esq., Superintendent of the Sutter Street Railroad Company, charging him with employing Frank Northy to bribe a juror in the Wright case last April. McCord was arrested and released on \$10,000 bonds. Another indictment on a similar charge was also found against Robert W. Morrow.

As soon as the indictment was found against Morrow, Capt. Lessert started in search of him, but soon discovered that he was out of town. The indictment found was for the charge of bribery. Morrow was arrested last Monday, but was presented because the first one was defective through a clerical error. Morrow will be arrested tomorrow.

THE CHARGE AGAINST MAILHOUSE DIS-

MISSING.

The charge of embezzlement against Julius Mailhouse, who was arrested as he was leaving for Australia, was dismissed today. The complaint against Mailhouse was sworn to by Samuel Nathan, who was arrested a year ago for a similar offense and grand larceny. It was shown that the watch and chain Mailhouse was accused of embezzling was stolen property, Mailhouse having been in the hands of the same owner for eight years ago. As Mailhouse has been leading an honest life for the past seven years, Judge Hornblower in the dismissing charge said that he thought the prosecution was prompted by anything but the honest desire to punish. It will not, on that point, for he said it was an attempt to blackmail him.

A STRIKE.

Switchmen at Port Costa Quit Work—Trains Delayed.

PORT COSTA, Aug. 5.—[By the Associated Press.] Most of the switchmen employed in the yards of the Southern Pacific Company here went on a strike this morning. The wages of the foremen had been advanced, but no advance had been made in the wages of the helpers, hence the strike. Five hundred car-loads of wheat remain unloaded, and many more are in transit. The engines were manned, but were prevented by strikers from going out. They tampered with the air-brakes on the Sacramento freight, and it was detained an hour, and would have been held longer but for the assistance of officers. Mr. Witherby, Mr. Witherby's son, and a young man, who were with him, were arrested on that point, for he said it was an attempt to blackmail him.

THE Florida Times thinks it would be interesting to know how many Floridians are now eating Northern potatoes and other products that could be easily raised at home, and declares that buying supplies from abroad is the main thing that has kept the South poor so long.

THE Teletograph.

And now Prof. Eliza Gray, of telephone fame, comes to the front with a new invention, destined to revolutionize the present system of telegraphic communication, which he dubs the teletograph. The principle involved is the reproduction of the exact facsimile of a written message. For instance, if a Springfield man happens to be in New York and wants to send his wife a check for money, he simply writes it out there, and the moment he is through it is in his wife's hands here. The electric current is, of course, an important factor in the invention, but the chief feature is the plate or instrument on which the writing is done. No special kind of pen or pencil has to be used in fact, a sharp-pointed instrument of any kind will answer the purpose. The paper on which the writing is done and the autograph reproduced does not have to be prepared. It is the pressure on the plate which gives the impulse to the machine, which reproduces the writing, while the reproduction is brought about by a tracing point, which may be a properly inked pen, or even an ordinary lead pencil attached to a movable arm in the receiving machine. Prof. Gray has made a number of successful experiments, and has his invention fully covered by patents. This is an age of invention and progress, and there have been apparently more impracticable inventions than Prof. Gray's teletograph.

Mrs. Grant and Her Family.

[Long Branch Letter in Washington Star.] Mrs. U. S. Grant, Sr., who is at her cottage here, has been told that the Sara is lost, and in all probability the Sara and her family, as usual, with her. Judge Dent's widow is also visiting Mrs. Grant. Mrs. Grant scarcely looks a day older, and is just as pretty and as healthy as when she was a young girl, and has as bewitching manners as when she was a young girl. She is a woman of whom no fairer has ever been beneath her roof, since she for nearly three years after her marriage assumed so many of the social duties there, in assisting her husband's mother. I have always associated Mrs. Cleveland with a young, beautiful bride in my mind more with Mrs. Fred Grant than with any other lady I have ever seen presiding in the Executive Mansion. The two have equally charming manners. Mrs. Grant and Mrs. Cleveland, whose youngest son has been born out of health, have with him, been visiting Mrs. Grant, but returned on Tuesday to their home in Washington. Mr. Ulysses Grant, Jr., after a visit to his mother here, left Tuesday for his country place in Westchester county, N. Y.

A Bridge Across Behring Strait.

[St. Petersburg Letter.] I saw Gen. Annels yesterday and he told me that he expected to leave for Bokhara the Samarkand branch of the Transcaspian Railway. The immediate supervision of the whole business having been confided to the two Gov. Generals of the Amoor and Eastern Siberia who are chiefly under the orders of the Ministers of War, the latter's authority in the matter is nearly sure to prevail. Certain Americans have already proposed to connect the Siberian line with the American one by building a bridge across Behring Strait. There is nothing impossible in it, as American or Russian engineers.

THE YIELD IN THIS STATE VERY SMALL This Season.

SAN FRANCISCO, Aug. 5.—[By the Associated Press.] From present indications, according to Change, the local trade journal, the California crop will be one of the lightest ever raised. Last year's crop was 2000 tons, but dealers say that they cannot count on more than one-tenth of an average crop. The weather has been disappointing and in the heaviest producing districts vegetation shows the effect of the hot sowing wind. The largest arrivals to date are from Los Angeles, Santa Barbara county. The crop at Los Angeles is light, as is the case at San Diego. The present

GOLD NEAR COLTON.

THE TOWN EXCITED OVER A Rich Strike.

Probable Loss of a Steamer and Sloop with All on Board.

Striking Switchmen Delaying Trains at Port Costa.

Gov. Bartlett Issues a Pardon to a Los Angeles Courier—The California Honey Crop Likely to Be Far Below the Average.

By Telegram to THE TIMES.

COLTON, Aug. 5.—[Special.] Great excitement prevails here over the discovery of gold in the mountains two miles southeast of Colton. The discovery was first made two days ago by Messrs. Slaughter and Wallin, but the fact was not generally known until today.

The ledge varies from twelve to eighteen inches in thickness, and promises well, as saying as high as \$150 per ton. The average is about \$75 per ton. About twenty claims are already taken, and quite a number of men are locating claims tonight by lantern light.

The discoverers are solid business men in whom all have confidence, and the assayer is a man of large experience and undoubted integrity. The find seems genuine and much is expected.

O.

SAN FRANCISCO.

Morrow and McCord Indicted—The Case of Mailhouse.

SAN FRANCISCO, Aug. 5.—[By the Associated Press.] The Grand Jury this afternoon presented an indictment in Judge Murphy's court against James McCord, Esq., Superintendent of the Sutter Street Railroad Company, charging him with employing Frank Northy to bribe a juror in the Wright case last April. McCord was arrested and released on \$10,000 bonds. Another indictment on a similar charge was also found against Robert W. Morrow.

As soon as the indictment was found against Morrow, Capt. Lessert started in search of him, but soon discovered that he was out of town. The indictment found was for the charge of bribery. Morrow was arrested last Monday, but was presented because the first one was defective through a clerical error. Morrow will be arrested tomorrow.

THE CHARGE AGAINST MAILHOUSE DIS-

MISSING.

The charge of embezzlement against Julius Mailhouse, who was arrested as he was leaving for Australia, was dismissed today. The complaint against Mailhouse was sworn to by Samuel Nathan, who was arrested a year ago for a similar offense and grand larceny. It was shown that the watch and chain Mailhouse was accused of embezzling was stolen property, Mailhouse having been in the hands of the same owner for eight years ago. As Mailhouse has been leading an honest life for the past seven years, Judge Hornblower in the dismissing charge said that he thought the prosecution was prompted by anything but the honest desire to punish. It will not, on that point, for he said it was an attempt to blackmail him.

A STRIKE.

Switchmen at Port Costa Quit Work—Trains Delayed.

PORT COSTA, Aug. 5.—[By the Associated Press.] Most of the switchmen employed in the yards of the Southern Pacific Company here went on a strike this morning. The wages of the foremen had been advanced, but no advance had been made in the wages of the helpers, hence the strike. Five hundred car-loads of wheat remain unloaded, and many more are in transit. The engines were manned, but were prevented by strikers from going out. They tampered with the air-brakes on the Sacramento freight, and it was detained an hour, and would have been held longer but for the assistance of officers. Mr. Witherby, Mr. Witherby's son, and a young man, who were with him, were arrested on that point, for he said it was an attempt to blackmail him.

THE Florida Times thinks it would be interesting to know how many Floridians are now eating Northern potatoes and other products that could be easily raised at home, and declares that buying supplies from abroad is the main thing that has kept the South poor so long.

THE Teletograph.

And now Prof. Eliza Gray, of telephone fame, comes to the front with a new invention, destined to revolutionize the present system of telegraphic communication, which he dubs the teletograph. The principle involved is the reproduction of the exact facsimile of a written message. For instance, if a Springfield man happens to be in New York and wants to send his wife a check for money, he simply writes it out there, and the moment he is through it is in his wife's hands here. The electric current is, of course, an important factor in the invention, but the chief feature is the plate or instrument on which the writing is done. No special kind of pen or pencil has to be used in fact, a sharp-pointed instrument of any kind will answer the purpose. The paper on which the writing is done and the autograph reproduced does not have to be prepared. It is the pressure on the plate which gives the impulse to the machine, which reproduces the writing, while the reproduction is brought about by a tracing point, which may be a properly inked pen, or even an ordinary lead pencil attached to a movable arm in the receiving machine. Prof. Gray has made a number of successful experiments, and has his invention fully covered by patents. This is an age of invention and progress, and there have been apparently more impracticable inventions than Prof. Gray's teletograph.

Mrs. Grant and Her Family.

[Long Branch Letter in Washington Star.] Mrs. U. S. Grant, Sr., who is at her cottage here, has been told that the Sara is lost, and in all probability the Sara and her family, as usual, with her. Judge Dent's widow is also visiting Mrs. Grant. Mrs. Grant scarcely looks a day older, and is just as pretty and as healthy as when she was a young girl, and has as bewitching manners as when she was a young girl. She is a woman of whom no fairer has ever been beneath her roof, since she for nearly three years after her marriage assumed so many of the social duties there, in assisting her husband's mother. I have always associated Mrs. Cleveland with a young, beautiful bride in my mind more with Mrs. Fred Grant than with any other lady I have ever seen presiding in the Executive Mansion. The two have equally charming manners. Mrs. Grant and Mrs. Cleveland, whose youngest son has been born out of health, have with him, been visiting Mrs. Grant, but returned on Tuesday to their home in Washington. Mr. Ulysses Grant, Jr., after a visit to his mother here, left Tuesday for his country place in Westchester county, N. Y.

A Bridge Across Behring Strait.

[St. Petersburg Letter.] I saw Gen. Annels yesterday and he told me that he expected to leave for Bokhara the Samarkand branch of the Transcaspian Railway. The immediate supervision of the whole business having been confided to the two Gov. Generals of the Amoor and Eastern Siberia who are chiefly under the orders of the Ministers of War, the latter's authority in the matter is nearly sure to prevail. Certain Americans have already proposed to connect the Siberian line with the American one by building a bridge across Behring Strait. There is nothing impossible in it, as American or Russian engineers.

THE YIELD IN THIS STATE VERY SMALL This Season.

SAN FRANCISCO, Aug. 5.—[By the Associated Press.] From present indications, according to Change, the local trade journal, the California crop will be one of the lightest ever raised. Last year's crop was 2000 tons, but dealers say that they cannot count on more than one-tenth of an average crop. The weather has been disappointing and in the heaviest producing districts vegetation shows the effect of the hot sowing wind. The largest arrivals to date are from Los Angeles, Santa Barbara county. The crop at Los Angeles is light, as is the case at San Diego. The present

stock in this city amounts to about 1000 cases, and prices are reasonable, but advances on these moderate rates may be expected.

ALL A FABLE.

Reports of Depredations by Apaches Near El Paso Denied.

TUCSON (ARIZ.), Aug. 5.—The Star's advice from Janos, Chihuahua, Mexico, dated July 26th, says: Reports sent out from El Paso of a band of Apaches depredating in this region are not true. There has not been a single Apache seen in the vicinity since Gerónimo's band surrendered to Gen. Miles, nearly a year ago. There is an organized band of Mexican outlaws, with some bands of Americans, who scour through the country stealing and murdering, but they are not Indians.

To this report from Janos, the Star adds: "From most careful investigation it is absolutely certain that there is not a single San Carlos Apache in the reservation, much less in Sonora or Chihuahua."

Los Angeles Convict Pardoned.

SACRAMENTO, Aug. 5.—Gov. Bartlett today granted a pardon to John Lopez, who was convicted of assault in Los Angeles in August, 1886, and sentenced to pay a fine of \$500 or serve 300 days in the County Jail. Lopez has served 300 days, and is in a critical condition from chronic disease.

RAILWAY INQUIRY.

Senator Stanford Before the Commission—His Testimony Shows Little Likelihood of Things of Central Pacific.

By Telegram to THE TIMES.

SAN FRANCISCO, Aug. 5.—[By the Associated Press.] The first business that took up the attention of the Pacific Railway Commission this morning was the examination of various documents which David Strong produced to strengthen his allegations made yesterday against the officers of the Central Pacific.

A CRUSHED KING.

The Hawaiian Monarch Has to Eat Crow.

After Much Shuffling He is Forced to Sign a Constitution

By Which He is Shorn of Almost all His Former Power.

Ex-Prince Gibson Tried and Acquitted on the Charge of Plundering the Hawaiian Government—Notes from the Old World—Later Reports from Stanley.

By Telegram to The Times.

SAN FRANCISCO, Aug. 5.—[By the Associated Press.] A special dispatch to the Chronicle from Honolulu says: The Hawaiian monarch, King Kalakaua, arrived this forenoon with Hawaiian advisers up to July 10th. The popular greeting, which was wrought up to such a pitch during the riot of June 30th, continued until the constitution was signed by King Kalakaua on July 10th. The time designated by that official to sign his signature to the document was on the 7th, but by various means he postponed the event until the popular feeling had become so worked up that a delay would have resulted disastrously to himself.

THE KING SHOWN OF POWER.

Kalauka's power for the time to consider the eventful issue at stake, but the people would not accede. The only alternative was to affix his signature, which he did, to the constitution. This deprives Kalakaua of the monarchial power heretofore enjoyed, except to draw his salary and grant pardons.

GIBSON ACQUITTED.

Ex-Prime Minister Gibson was acquitted on the 12th on the charge of defrauding the Government. After the verdict was rendered Gibson took passage on the bark John D. Spreckels for San Francisco. The bark is now due here.

Business has been resumed. Capitalists who were holding back are investing money, and a general feeling prevails that Hawaii has a stable Government under which just laws will be enacted.

NOTES FROM ABROAD.

Later Reports of Stanley's Journey Through the Dark Continent.

LONDON, Aug. 5.—[By the Associated Press.] Further advice from Henry M. Stanley says that on June 6th the expedition reached a point half way between Yambi and Yambuna, the latter being the furthest point on the Aruwahini reached by Stanley in 1883. Navigation was difficult and slow.

From advice received on Thursday it would appear that Stanley has been obliged to await the arrival of the contingent left at Bolobo and Leopoldville and had adopted an overland route, which would occupy a fortnight longer than the sea route.

THE IRISH LAND BILL.

In the House of Commons a section was added to the Land Bill extending the term for payment of arrears in instalments to the Land Commission. The proposal by Mr. Shaw-Lefevre (Liberal) for a provisional revision of rents to prevent a block in the land court caused a long debate. The proposals submitted by Mr. Shaw-Lefevre (Liberal) to apply the land act of 1881 to pastured holdings was rejected by a vote of 180 to 43.

SHERWOOD JOHN BRIGHT.

The Unionist members of Parliament gave a banquet to Lord Hartington tonight. Mr. Bright, who presided, prefaced his remarks by saying that those who complained of their supporting the Tory Government were those who had been in and wanted to be in again.

NOTES.

LONDON, Aug. 5.—The number of men on the Midland Railway, who went out on strike last night, is 4,000, and the strike is spreading. Freight traffic on the road continues partially paralyzed.

PARIS, Aug. 5.—It is stated that the German Crown Prince has been advised by medical men to try the waters of Cauterets, in France, but that Bismarck and Prince William oppose the suggestion.

PARIS, Aug. 5.—Sara Bernhardt will make another tour by foot, from Calcutta to India, China, Japan, Australia and America.

BERLIN, Aug. 5.—Thirty-eight French railroad employees, residing in Aachen, near the frontier of Germany, have been expelled from the country.

ROME, Aug. 5.—Italy has consented to join the sugar-bounty conference.

A Town Wrecked by Wind.

KANSAS CITY, Aug. 5.—Millbrook, Graham county, twenty miles west of here, was almost destroyed about sundown yesterday by a wind, coming from slightly west of north. The place contains about 500 inhabitants. Only one house, a residence, escaped serious damage. One person, a boy 3 years old, was killed. About twenty-five were injured. Some sustained broken limbs, but only one of the injured is likely to die. This is W. B. Keith, a furniture dealer of Wakeeney.

El Paso's Celestial Population.

EL PASO (Tex.), Aug. 5.—The Chinese population of El Paso is increasing at a rapid rate. The city authorities have awakened to the necessity of controlling and checking the influx. Last night ten keepers of opium joints were arrested and their dens raided. There are twelve regular opium dens here and eight laundries where the drug is smoked. Two of the ten raided dens have doctors' licenses hanging on the wall. This is in a cellar adjoining the joss-house.

A Museum for Coronado Beach.

SAN DIEGO, Aug. 5.—The Coronado Beach Company this morning closed a contract with Prof. Henry A. Ward, of Rochester, N. Y., to equip a museum of natural history, to be built by them in one of the parks, near the Hotel Del Coronado. The contract price to be paid Prof. Ward is \$25,000. This does not include the building, which will probably cost \$100,000 more.

Stoneman's Alleged Sale.

SAN FRANCISCO, Aug. 5.—Ex-Gov. Stoneman has returned from his trip to Alaska, where he had been since June. When asked if the rumors that he had sold his orange grove at San Gabriel for \$400,000 were true, he replied: "No. Last June, before leaving Los Angeles, I sold seven acres of the outlying land. It was no part of my home place."

She Would Not Testify.

SAN JOSE, Aug. 5.—Mrs. Jennie Vaughn, whose husband, C. H. Vaughn, shot and dangerously wounded T. A. Parrish, on Friday night of last week, was discharged from custody today, the officers becoming satisfied that she could not be induced to testify against her husband, unfaithful as she admits she has been to him.

Labor Trouble at San Diego.

SAN DIEGO, Aug. 5.—Some of the striking union men went yesterday to the yards of the Southern California Lumber Company and ordered several non-union men working there to leave. The men appeared to the City Marshal and he promised to supply all need protection, and the men returned to work today.

Henry George on Socialism.

NEW YORK, Aug. 5.—In today's Standard Henry George says: "It is necessary that the platform to be adopted by the United Labor Party Convention, which is to meet at Syracuse on the 17th, should firmly and clearly define the position of the party with relation to Socialism. This is rendered

necessary by an organized endeavor of the Social or German Socialists. Association to improve their position in the party. This endeavor has become so notorious that any disposition to evade the issue, whether or not the United Labor party indorses their views, could give its enemies a specious pretext to make the charge that it does.

Want the Barracks Removed.

SAN DIEGO, Aug. 5.—At a meeting of the Chamber of Commerce last evening it was decided to send a petition to the Government to remove the barracks from the present location near the principal wharf to the Government property near Ballast Point, at the mouth of the harbor.

Killed by a Cave-In.

SONOMA, Aug. 5.—Thomas Ebbert, while quarrying in the hills north of Sonoma, was instantly killed today by a bank caving in upon him, crushing his head in a fearful manner. He was 40 years of age, and a native of Switzerland.

Freight Train Wrecked.

TUCSON (Ariz.), Aug. 5.—The east-bound freight was wrecked this afternoon, near Wilcox. Seven cars were smashed up. The cause was spreading of the rails.

Death of Charles D. Irons.

TRUCKEE, Aug. 5.—Charles D. Irons died here today, after a lingering illness.

SEASON'S SPORTS.

The Volunteer Defeats the Puritan and Carries off the Goelet Cup.

—Events on Track and Field.

By Telegram to The Times.

NEWPORT, Aug. 5.—[By the Associated Press.] The day opened brilliantly for the Goelet cup yacht race. The length of the course is forty miles. The big sloops got away at 10:30, in the following order: Puritan, Mayflower, Volunteer, Priscilla and Atlantic. The others were not distinguishable. At 11:30 the Puritan, which took the lead in the starting, was sailing faster than the others and easily leading the entire fleet.

At 11:45 the Puritan was still leading, but the Volunteer was gaining on her.

At 1 p.m. the yachts were nearing the turning point at the end of the first leg of the course. Positions were unchanged except that the Volunteer seemed to be gaining still further on the Puritan, and the Sachem on the schooners. The race was apparently between the Volunteer and the Puritan.

NEWPORT, Aug. 5.—The leading yachts are now on the way home. The Volunteer is away ahead.

The Volunteer has just crossed the line a full mile ahead.

THE BALL-FIELD.

Chicago Captures An Almost Hopeless Game From New York.

CHICAGO, Aug. 5.—[By the Associated Press.] The Chicago team won the game with the New York today after all hope seemed gone. For five innings the score was blank and then New York made three runs by virtue of four hits and Ryan's error. This seemed to settle things, but in the seventh Connor's error gave a man a base, and a single, double and triple fixed three runs.

This tied the score, and in the eighth Chicago managed to get four runs, and this settled the game. Score: Chicago, 7; New York, 3.

WASHINGTON DEFEATS PITTSBURGH.

PITTSBURGH, Aug. 5.—The first six innings of the Washington-Pittsburgh game today, at Recreation Park, were exceedingly interesting. The twirlers for either side seemed invincible, and although the ball was hit it seemed impossible to place it safely. Darymple became faint in the sixth inning and retired. Fields took his place. Carroll, Pittsburgh, played in very poor form, and besides made several wild throws. The attendance was 1200. Score: Pittsburgh, 1; Washington, 5.

INDIANAPOLIS, Aug. 5.—No game—rain.

A POOR DISPLAY.

DETROIT, Aug. 5.—A small crowd went to Recreation Park today to witness the game between Detroit and Boston, but received but little reward for their money. The game was a poor one in many respects, and Boston frequently hissed. Kelly pitched the last five innings in bad form. Score—Detroit 8, Boston 5.

OTHER GAMES.

PHILADELPHIA, Aug. 5.—Athletics 7, Metropolitans 4.

BALTIMORE, Aug. 5.—Brooklyn 5, Baltimore 1.

ST. LOUIS, Aug. 5.—St. Louis 0, Cincinnati 5.

LOUISVILLE, Aug. 5.—Louisville 10, Cleveland 5.

CHICAGO COMING TO CALIFORNIA.

CHICAGO, Aug. 5.—Manager Hart, of Milwaukee, has closed a contract with the Chicago club for a trip to San Francisco and other cities on the Pacific slope next winter. During the League champions and St. Louis Browns will play a series of exhibition games during the months of December, January, February and the early part of March. Hart also secured the services of Mike Kelly, of the Boston, to play with the Chicago during the winter. A Detroit manager has also been negotiating with the Chicago to have them and the Detroit play on the coast.

THE TURF.

Haggin's Rosalind a Winner—Great Pacing Race at Buffalo.

SARATOGA, Aug. 5.—[By the Associated Press.] Light rain; track heavy. One mile—Alfred won. Haggin's Rosalind, the bronze, brought third. Time, 1:45. Thirteen starters.

Five-eighths of a mile, 2-year-olds—King Crab won. Fleurelle second, Pweep third. Time, 1:18. Fourteen starters.

One and one-eighths miles, sweepstakes—Wahoo won. Swift second, Haggin's Miss Motly third. Time, 1:58. Seven starters.

One mile and seventy yards, selling—Chance won. Unique second, Santa Claus third. Time, 1:31. Nine starters.

RACE AT HUFFDA.

BUFFALO, Aug. 5.—Seven thousand people attended the races today, it being the last of the meeting.

The unfinished 2:25 trotting race came off first. Monbrinette won the fifth and sixth heats, and Benstar the seventh and the race, Time, 2:31.

Twenty-three trot—Sarah B. won. Daisy Wilkes second, Milkman third. Time, 2:55.

2:19—Bell Hamlin first, Tom Rogers second, Billy Britton third. Best time, 2:17.

Free-for-all—Arab first, J. Q. second, Charles Hild third. Time, 2:17.

The special pacing race, \$5000 purse, Johnson to wagon, Toledo Girl and Gossip, Jr., in harness won by the great pacer, Johnston first, Gossip, Jr., second, Toledo Girl third. Time, 2:18.

A Miner's Death.

VIRGINIA (Nev.), Aug. 5.—Mike Hurley, employed in the 1503-foot level in the Consolidated California and Virginia mine, was found dead on the floor this afternoon. It is surmised that he ascended into the upraise too soon after a blast was fired and was asphyxiated.

Four Persons Drowned.

COUNCIL BLUFFS, Iowa, Aug. 5.—A pleasure steamer sprung a leak on Lake Manawa yesterday during a squall, and four persons were drowned.

Death of a Union Spy.

JAMESTOWN (N. Y.), Aug. 5.—Pardow Worsley, the Union spy of Shenandoah, died at his home at Foster Brook, aged 67.

BANNING.

An Arcadia Away Up is the Mountain.

[San Bernardino Index.]

Banning is about ninety miles from the ocean, and twenty-eight miles east of San Bernardino, near the summit of the San Geronimo pass. Its altitude is 2500 feet above sea level. During the summer it enjoys the cool sea breezes from the west, and in the winter the dry, warm desert air from the east. It is shielded from the cold northerly winds by the San Bernardino range of mountains, which rise to a height of 12,000 feet just north of it. The San Jacinto range on the south protects it from the gulf winds. The lowest temperature in winter is from 30 to 35 degrees, Fahrenheit (ordinarily much higher), while in summer the heat is never excessive, averaging some ten degrees lower than in Riverside or San Bernardino. The Southern Pacific railroad company's map based upon carefully prepared thermometric tables, places Banning in the citrus belt, the correctness of which is proved by the healthy, thrifty orange trees on many of the ranches there.

Banning has a bountiful, never-failing supply of cool, pure mountain water, for both domestic and irrigating purposes. This water is distributed to residences and fruit lands in iron pipes and cement conduits. The water never becomes turbid or breeds unhealthy miasma. The natural drainage is perfect, averaging eighty feet to the mile, according to the railroad company's surveys. The atmosphere is pure and dry; fog is extremely infrequent; the relative humidity is less than at any other point this side of the desert. The soil is warm and porous, and will grow any variety of fruit. Olives, oranges, raisins, grapes, almonds, prunes and apricots are especially adapted to this locality, while pears, apples and cherries prosper. It is surprising with what unanimity the medical profession has indorsed the healthfulness of Banning. Dr. S. S. Lawrence, editor of the Medical Brief, of St. Louis, who has recently traveled through Southern California, and who has made a special study of the health resorts of Europe and America, asserts that he knows of no climate for consumption superior to that of Banning. Prof. H. A. Johnson, of Chicago, member of the National Board of Health, writes enthusiastically of the climate along the border of the interior plateau, in which Banning is situated. Dr. John C. King, of Banning, has published a series of fifty consecutive cases of consumption that were under his observation, of which 58 per cent. improved and 18 per cent. were actually cured.

JUMPED FOR THE JUG.

An Alameda Boy's Reckless Feast—He Got the Claret.

[Oakland Enquirer.]

Shortly before noon yesterday, as a train carrying passengers from San Francisco over the broad-gauge line stopped at Grand street, Alameda, a man with a demijohn climbed on the front platform of the car directly behind the engine. The demijohn, if its apparent weight afforded any indication, contained something strong; but the man was strong, too, and as black smoke smoke his face he would have borne his load into the car had he not seen a laboring man leaving his shovel outside, and evidently satisfied of its security, going in unnumbered. The man with the big bottle followed his example. He put his demijohn down upon the platform, stepped inside and closed the door. Then he stood looking through the front window at the puffing engine, and as he watched it a startling thing happened. The train had traveled about half way to the next station, and was running as fast as the rules of the road allow, when a reckless fellow of perhaps 15 years of age, admirably calculating time and distance, hurried himself from the rear of the train, and struck the engine. He struck the door violently, but he was not hurt, and he jumped quickly to his feet. The man looking out of the window gave a gasp of horror as he saw him launch himself from the ground, and with a relief which he realized that he had borne his load into the car had he not seen a laboring man leaving his shovel outside, and evidently satisfied of its security, going in unnumbered. The man with the big bottle followed his example. He put his demijohn down upon the platform, stepped inside and closed the door. Then he stood looking through the front window at the puffing engine, and as he watched it a startling thing happened. The train had traveled about half way to the next station, and was running as fast as the rules of the road allow, when a reckless fellow of perhaps 15 years of age, admirably calculating time and distance, hurried himself from the rear of the train, and struck the engine. He struck the door violently, but he was not hurt, and he jumped quickly to his feet. The man looking out of the window gave a gasp of horror as he saw him launch himself from the ground, and with a relief which he realized that he had borne his load into the car had he not seen a laboring man leaving his shovel outside, and evidently satisfied of its security, going in unnumbered. The man with the big bottle followed his example. He put his demijohn down upon the platform, stepped inside and closed the door. Then he stood looking through the front window at the puffing engine, and as he watched it a startling thing happened. The train had traveled about half way to the next station, and was running as fast as the rules of the road allow, when a reckless fellow of perhaps 15 years of age, admirably calculating time and distance, hurried himself from the rear of the train, and struck the engine. CHAUTAUQUANS.

THE COLLAGE AT THE BEACH
STILL FLOURISHING.

Rev. Dr. Weller's interesting lecture (before the C. L. B. C. Round Table) on Mendelssohn, the Great Composer—The Record of a Greek Life.

The last week of the Chautauqua Assembly, at Long Beach, is drawing to a close, and still the interest keeps up unflaggingly. One of the most interesting of the lectures this week was Rev. Dr. Weller's, Thursday, on Beethoven, a digest of which is as follows:

MENDELSSOHN.

Dr. Weller's lecture on the Great Composer.

The last of the series of four lectures was delivered yesterday at 10 o'clock. All who have heard these lectures have been delighted. They are a very cyclopedia on the subject of modern music, especially the oratorio. Send for the Chautauqua News and get these lectures in extenso.

Best thou a man delighted in his business he shall stand before kings.—(Proverbs, xlii, 22.)

Among the many millions of human faces I suppose that no two have ever been found that look exactly alike. Resemblances are myriad, but exact mutual duplicates, I suppose, never occur. In the gallery of our "great composers" there are many resemblances, and also many and even marked differences. We find them without exception to have been tireless workers. Each of them strived for the masteries and was crowned. Each ran in the race, and so ran as to obtain.

In certain of these great characteristics there is a sameness amounting almost to monotony. We may learn from this that there are features that distinguish every great life; that there are no by-paths to crowns; that there is no royal road to success.

There was great difference in the circumstances of these men. The most of them were poor, but poverty was no bar to the crown of success. In the worldly circumstances Mendelssohn was unlike all the masters among whom he stood as a peer. He was born in affluence, and was free to give all his years to the work of his life.

In Mendelssohn the ambition of success was as deep-seated and overshadowing as in his contemporaries, then from childhood he sat in the lap of fortune, and every help he needed was provided.

Like the fabled giant Briarion, his fortune made him hundred-handed in reaching after the crown of success.

It would seem that Mendelssohn had entered all the kingdoms. He was trained in all the wide learning of the schools, and was an honored disciple in the greatest of all kingdoms. He stood before the kings and queens of the earth, and above all, stood in honor before the King of Heaven.

Wealth had strewn all his path with flowers, but there appears nowhere any indication of its having checked him in his path toward the crown of knowledge, or achievement or salvation. "Diligent in one's business," is the key to his success.

Two things saved Mendelssohn from the perils into which over-indulgence is apt to lead young men. First, he had inborn predisposition to musical study. He was precocious, almost a prodigy in musical taste and musical capacity at 9 years of age. Before the habits of luxury had time to grow, he found himself absorbed in what proved to be the sphere of all his years.

The firm, loving hand of a Christian mother ruled in that Christian home, through whose healthful air he passed the crucial days of his childhood. He had the training of the home, of the school, and of the university. This made him; not only the master in music, but the symmetrical scholar as well. Through the influence of the home he became strong and beautiful in Christian life.

Of all the masters Mendelssohn was the most cultured, the most symmetrical. You have little in him to apologize for. His life was a river of peace from beginning to close.

When he died his funeral was observed in all the great cities of the continent and in England as well. He died in Leipzig, and the funeral train went by night to Berlin. At the principal stations were gathered great choirs, who sang selections of his own music, or others written for the occasion. It was a solemn and memorable event. Rarely has a private untitled citizen been so honored as he passed out of the years to the timeless, measureless shores. Mendelssohn's home was almost ideal. It was elegant, cultured, refined and Christian. His wife was his peer in the culture of the head and in the grace of the heart. Love, that was strong and mutual, and sunshine that knew never a cloud were perpetual there.

Mendelssohn's power of interpretation was remarkable, music that was supposed dead, was made to live in his hands. It is not new truth, so much as interpretation of old truth, that the world needs. It is said that he knew better than any other living man how to lead others to sing with the whole soul. And when music or speech with the soul left out?

He passed away in the prime of his years. His greatest oratorio lay unfinished when he fell into the grave. His theme was Christ, and he never more than outlined his plan. This shows that it would have been worthy of the theme, a fitting crown for the artist's life work.

As a fully rounded, full-orbed soul, Mendelssohn must have the palm. In beautiful, royal manliness he overtops all the stars in the galaxy of his contemporaries. He was not long-lived. Not years but deeds measure him. His immortality lies not in the breadth of his span, but in the grain of his soul.

MOHAMMEDAN WOMEN.

A Lecture by Selah W. Brown, Thursday Evening.

No speaker draws a larger crowd than Mr. Brown. He is a lecturer of a high order. The large tabernacle was crowded to its utmost capacity to hear this third lecture of his course. We give the following synopsis:

"Don't take on so Kate," said grand old Martin Luther as he and his wife were weeping over the dead body of their daughter Margaret. "Don't take on so Kate; don't you know that this is a hard world for girls?" Martin Luther was right. This is a hard world for girls and women. Not in happy homes where woman is queen, not in Christian lands, where womanhood is honored and loved, but in all lands where the Bible is not known. Every religion on earth except Christianity degrades women. In all pagan and Mohammedan lands she is treated as if far inferior to man. The Chinese have a saying that "man is as much above woman as heaven is above earth." Of the daughters of India it is said: They are unwelcome at birth,

untaught in childhood, enslaved in marriage, accursed as widows, unloved in death.

A Mohammedan speaks of his wife as he would of his dog or his donkey. Dr. Thompson tells us of a Syrian adjective which expresses as much of violence and meanness as they can crowd into one word, and that adjective is the word commonly applied by the Arabs to their wives. An Arab has more respect for his horse than for his wife. In Persia it is a great insult to a man to inquire after his wife.

A Hindoo speaks of his wife as "my servant," or "my dog," but she must answer "my lord." In most heathen lands the birth of a daughter is looked upon as a calamity—an occasion for sorrow. Often the grief of the father is very great, and even the mother calls her female friends around her to weep over her misfortune. The fact of her being a girl is often sufficient reason for putting her to death. Infanticide is fearfully common in many pagan lands. A heathen mother on being reproved for destroying her children replied with tears, "Would God, my mother had destroyed me at my birth and thus prevented the distress I now suffer."

One of the saddest sights I ever saw was the baby towers near Shanghai in China.

On these were shown the little bodies without shroud or coffin and sometimes before death.

In marriage, heathen women are not at their liberty.

All marriages are arranged by parents or friends. Children and even infants are betrothed, and child-marriage is one of the great curses of pagan lands. In many places the wives are sold like so much property, and pleased or displeased they must go to be the companions of those they have never seen nor loved.

Again: Woman's education is neglected. In all pagan and Mohammedan lands there is not a school for girls. "What!" said a Brahmin, "educate my daughters. I would as soon think of educating my cows."

In all heathen lands polygamy is common, and that alone destroys the domestic happiness and brings to each home every jealousy, hatred and strife. Divorces are always very common, and that, too, for the smallest offense.

In some lands a wife may be put away even for speaking unkindly to her husband. In fact, the wife is nothing better than a slave. The Koran authorizes the husband to chastise her. The Hindoo Shasta says: "The wife must keep her eyes upon her husband when he is present."

When he speaks she must be silent. When he laughs, she must laugh. When he weeps, she must weep, and when he sings she must be in ecstasy. "A woman has no other god than her husband," says the aged, infirm, dissipated, a drunkard or a debauchee, still she must regard him as her God.

"Let the woman who wishes to perform sacred devotion, wash the feet of her husband and drink the water." Paganism gives no soul to woman. Said a Mandarin to a French traveler: "Women have no souls," and when it was argued that they had, the Mandarin laughed long and loud, and replied: "When I get home I will tell my wife she has a soul, and she will be as much surprised as I."

Buddhism, the great religion of Japan, China, Siam, Java, Sumatra and Ceylon, in fact, the mammoth religion of the world—provides no heaven for women. There is absolutely no hope for the future. Her only hope is to die and be born again as a man, and if good and faithful she may have another chance on earth in the form of a man, but if unfaithful her life may be that of a dog, donkey or reptile. Hence, in China the earnest prayer of a woman for a future life is that she may be a man. Mohammedans believe that women have souls, but the Koran teaches that their future salvation depends upon their husbands. If faithful and obedient to them they can secure salvation in the world to come.

Another people in a heathen woman's life is her seclusion from society. Millions of them are closely confined in Zenana's harems. I used to think the word "Zenana" a beautiful word, and romantic; but since I have learned its meaning it has a sad sound. It means woman's apartments, but that means woman's prison. In a high-caste Zenana it means magnificent degradation. It means beautiful women in gorgeous apparel; but oh how degraded, polluted, ignorant and superstitious. In a low-caste Zenana it means women huddled together in a mud hut, destitute of every comfort, and often sharing the room with domestic animals. Yonder in the gloom and darkness of paganism and Mohammedanism are 500,000,000 of your sisters living and dying without education and without hope—500,000,000 knowing nothing of the earth on which they live, or of the immortal soul within, or of the eternity before them—500,000,000 despised, neglected, superstitious, degraded, ignorant and abused. Lay your ear to the earth's telephone and listen to the wail of woe coming up from many a dark land from Japan's lovely shores, from China's teeming millions, from "Greenland's icy mountains," from "India's coral strand," from "Arabia's burning sands," from Persia's flowery gardens, from "many a princely river," from many a palmy plain. It is a wail, long and sad, coming up from the night and the gloom!

Yonder, on a wild and stormy sea, near the coast of England, are nine men clinging to a broken wreck. All night long they have been struggling with the fierce waves. In the early morning the daughter of the light-house keeper sees their peril. Rushing into the lighthouse she says: "Father, we must save these men." "We can't save them," he says, "in such a fearful storm." "We can save them," says the brave girl. But says the father: "The boat cannot live a minute in such a sea." "Never mind; if you will not go, I'll go alone." They entered the boat, she takes one oar, he the other. They pull away and away through the storm until they reach the wreck. Now the men are in the lifeboat, and the courageous girl turns toward the shore.

At last, all are safely landed. All England rings with the praise of Grace Darling. Gold and gems are sent as a reward to the brave girl, and thousands on thousands wept when she put out on that sea whereon no voyager returns.

So, O woman! yonder on the stormy sea of life are millions of your sisters. Send them the lifeboat! Tell them of the gospel, and by-and-by, laying your ear to the telephone of heaven, you will hear the Master saying: "Inasmuch as ye did it to the least of these, ye did it unto me."

Town Lots Given Away.

The California Cooperative Colony offers to give a few good lots in the new town of Clearwater to parties who will erect houses thereon, of certain specified values. This is a rare chance for persons wishing to establish homes in a good location by a moderate outlay of money.

For further particulars call at the office of the Cooperative Colony, rooms 3 and 4, Newell block, West Second street.

\$25155, Bunker Hill avenue, \$7500.
Beautiful residence on Olive street, \$12,000.
6-roomed cottage on Flower street, corner, \$5000.
6-roomed cottage in Park Villa tract, \$3000.
4-roomed cottage on Nevada street, \$2500.
6-roomed cottage on Temple street, \$4200.
6-roomed cottage on Victor, near Temple, only \$1000 first payment.
Three lots on Bellevue avenue, near Sisters' Hospital.
115 acres of land near San Fernando; price, \$50 per acre, cash; six springs on the place.

Real Estate.
23,000 ACRES 23,000

Of the famous CHINO RANCH have been subdivided and will be placed upon the market about August 8d.

A Great Chance

For investors, speculators, and parties who wish to purchase land where the productions will pay a fair interest on the investment. This land is better adapted to produce FOOD or something to live on, than any tract in Southern California. There are 10,000 or 12,000 acres of Market Garden, Alfalfa and Corn Lands.

A LARGE AREA

Of raisin grape and wine grape land, and a large area suitable for peaches, pears, apples, walnuts, etc., etc. Surface water over a great portion of this land at from 4 to 12 feet deep.

ARTESIAN WATER

Has been struck, and it is believed that most of it is within the Artesian belt.

The town of CHINO will be laid out shortly, and a railroad through the tract is an assured fact.

This land is the finest in the county, and will be sold at prices within the REACH OF ALL.

Richard Gird,
John G. North, Agent. N. T. Blair, Assistant.
POMONIA, CAL., Proprietor.

BUSINESS MEN

Are Invited to Investigate the Claims Made by

LUCERNE!

The new town located at the head of Lake Elsinore, San Diego county.

For this purpose the California Central and Southern Railroad has provided an excursion, to make the round trip in special cars. The day and date of the next excursion will be announced in local columns.

Half-fare, Pleasant Ride

And an opportunity to see the only really manufacturing and producing locality in Southern California. Come and see mines, brick-yards, sewer-pipe works in construction, limestone asbestos, copper, clay, coal and bituminous shale.

PROSPECTUS

—OF THE—

Compton Artesian Water Co.

There has been secured, just over the "divide," due west from Compton,

300 Acres of Artesian Water Land

ON WHICH ARE NOW DEVELOPED

NINE ABUNDANTLY FLOWING WELLS

—OF THE—

Finest : Artesian : Water,

Two of which are quite strongly impregnated with white sulphur.

ON ONE HUNDRED ACRES

Of this tract, as has been demonstrated by actual test on various portions of it, artesian wells can be had on every square rod at a depth of from 90 to 500 feet, the latter depth going down through three different water-bearing strata, which is about 200 feet in depth.

With the exception of thirty acres of the Pomeroy-Burlingame tract, adjacent on the north, this is the

ONLY ARTESIAN BELT

West of the mesa between Compton and the immense body of land between it and the San Pedro and Santa Monica bays. This water can be taken out at a level from sixty to eighty feet above tide-water. It can be had in unlimited quantities and can be easily piped over 40,000 to 50,000 acres of land on the San Pedro, the McDonald, the Sausal Redondo and the Freeman ranches. While there is surface water to be had on this vast body of land at a depth of from 50 to 150 feet, generally, it is not of the best quality and has to be pumped by power for domestic or irrigating purposes. The artesian water on the 300 acres alluded to is found on the west bank of a ravine half a mile west of the Wilmington telephone road, which ravine trends to the southwest. On the west side of the ravine no artesian water can be developed.

It is proposed to put this water and the land adjacent, which controls the right of way to the lowland, into a

JOINT STOCK COMPANY,

Which will not only utilize the immense amount which is now daily flowing to waste, but to sink numerous other wells as the demand increases, and it is certain to do, for the land in that region is being rapidly bought up, subdivided and disposed of in 20 to 40-acre tracts. Each of these occupiers must have this water, because it can be furnished cheaper than any other and also because it is absolutely pure and free from any sediment, to say nothing of its medicinal qualities.

The capital stock will be divided into 20,000 shares of the par value of \$5 each, 50 per cent. of which will be required in cash and the balance in six months and one year at 8 per cent. Subscriptions to the stock will be received at my new office, 316 North Main street, in the Real Estate Exchange.

The land and the improvements now on the property are richly worth today the full amount for which I propose to capitalize it. There is no project before the public which will realize so large dividends as this.

Stockholders may pay the amount of their subscriptions into the First National Bank where it will remain until they meet, organize and elect their officers, who are to expend the money for the purposes of development.

Surveys and levels are now being made, and maps and plans of the territory to be watered and covered will be prepared at the earliest possible moment, where they may be inspected and all other information obtained as above.

The persons who control a permanent supply of water in Southern California have a better thing than a valuable gold mine.

The water in this scheme will be stocked, but the stock will not be watered.

Lumbermen Attention, Please!

I have five tracts of redwood lands in the northern part of the State for sale. Title perfect and fine properties, ranging in size from 2000 to 3000 acres—including one lumber-mill outfit—ranging in price from \$30,000 to \$175,000. Call and see me.

ALVAN D. BROCK,

316 North Main Street,

Real Estate Exchange.

A HIGH OLD TIME.

HOW PHILOSOPHER SHAW WAS
RANGED FOR MUTINY.And if He Hadn't Laid About Him-
self Lastly With a Belaying Pin or
Something He Wouldn't Have
Been Able to Tell This Tale.

It is a mortifying evidence of the effect of dissipation that the writer is about to put on record. Just how much of the incidents here given transpired, we are not able to state, and this version of the affair is offered with a hope that there may be some one yet living that will be able to clear up the partial uncertainty connected with it.

In 1850, in the Gulf of Mexico, on board the United States mail steamer Cherokee, there was an incident similar to the case of young Upsher and his partner, who were executed on a United States ship. It was of those rare and extreme cases, where it was deemed necessary to sacrifice the lives of the leaders in order to hold the others in subjection. Upsher was a "fast" young man, who conceived the idea of becoming a free rover on the seas; while the case we have to record was in all its essential details the exact opposite.

I had laid in a barrel of Madeira wine in San Francisco for use on the trip down the coast of California and Mexico. This, with English ale and porter, was used freely for months in the tropical countries, so that when the camp at the mouth of the Chagres river was broken up, we were in a condition to invite the attacks of "yellow jack" or any other pestilence. After three days at sea the fever broke out. There had been over \$5,000,000 in bullion and specie and "dust" taken on board at Chagres. This filled a room amidship, ten feet square. (My own "dust" was in the hands of the purser.)

As the writer had been a sailor before, he naturally visited the forecastle, and generally at meal time. Noting that the provisions were unusually good, the remark was made that they had no cause to complain, as the writer once had, of being fed on moldy bread and stinking meat, to the verge of mutiny. This conversation was listened to by the second steward, who, for some cause, had conceived a dislike for me. There was another man from Jamaica, also, that had charge of my stateroom and the others on the starboard side of the saloon, about the boilers. This fellow I had caught pilfering "trinkets" and keepsakes that I was taking home to my sisters. The last time he was found in the act he was handled very roughly and thrown out over the dining-table. He got up and swore vengeance. It was not many days after this that I was arrested and ironed, charged by the rascal and the second steward with endeavoring to incite the crew to mutiny, to take the ship from the officers, living the money, and scuttling and destroy the ship. Upon this trumped-up charge I was tried by a hastily-improvised court-martial and condemned to be hung at the yard-arm in half an hour. It was no use my pleading my youth and early training by a pious mother and father, and a blameless life. There was a guard placed over me of two men to walk me up and down the quarter-deck until preparation could be made for my execution. This march had not continued for many minutes when I determined to jump overboard, if I could get the opportunity. I made excuse that I must go to the water-closet about the roundhouse. The officer occupied about twenty-five feet of the afterpart of the quarter-deck, and left only space between it and the taffrail for one person to pass at one time. I thought by walking fast enough I could get far enough in advance to jump overboard, as the other man did not go ahead but went on the opposite side of the roundhouse. I stepped briskly off and on to the plank shear, and had my body balanced on the taffrail to plunge overboard, when the man behind me ran up in time to catch me by the heels and draw me back, with the exclamation: "No, you don't, old fellow, you have got to hang." This maddened me. They thought it endangered their chances of hanging me, as they knew if I got overboard with the iron on I should sink too quick for recovery; so the iron was taken off. The march was continued past the after captain, the short bars of which hung in beackets on the stanchions. As soon as opportunity offered I got hold of one of these short capstan bars and began swinging it around my head, flooring my two guards at once. This raised an alarm, and the crew were ordered to secure me. Before this was done several more were felled. But I incautiously backed under the mizen rigging. A man that was in the shrouds hit me on the head and knocked me down. They jumped on to me and stamped the breath out of me, and then lashed me to the main hatch. The surgeon saw that I was suffocating, and told them to take the lashings off, telling them they would not get a chance to hang me, as they would kill me by such usage. The lashings were removed slowly. As soon as I felt that they were clear of my limbs, I got out of the hatch-house as quick as a cat. It was a good ten minutes work to drive me under the mizen rigging again; and by the time it was done I had the most of the crew felled; as I understand thoroughly, the manly art of self-defense. The last time I was knocked senseless by a blow on the head with an iron belaying pin. How much time passed in an insensible condition I do not know. I thought I was dead and in hell, as fire was burning all around me. When one kind of fire ceased to hurt, another was tried until I recognized the smell of sulphur. This confirmed my belief in my own death. (It appeared that a quantity of matches took fire in the hatch-house at the time.) When I came to any knowledge of my own situation, the surgeon had his ear at my breast, the chambermaid had hold of one hand, and Mr. W. Yooff the other hand. The surgeon said that I was dead, that mortification had already set in from the bruises on my body and limbs.

This rather interested me, as I understood all that was said and done, but could not move or speak. I do not know how long this state of things existed. The surgeon was a young man, and yet hardened by long practice, and I could see that his sympathies were excited in the case. I longed to tell him what to do in case of gangrene, but could not for a long time make any sign. At last the surgeon thought he saw signs of life left in me, and watched carefully. When I could whisper in his ear, I suggested a remedy for gangrene. He flew to prepare it with his own hands, instead of awaiting the movements of a servant. In half an hour after the application I was wending my way slowly back to life, and in twenty-four hours was past danger. It appears that Tom Smith and Hawkins, the two young men who roomed next to me forward, saw the altercation between the thief and my-

self, although unseen by him or me. When the results of the trumped-up charges were known to them, Mr. Yooff and they coaxed the conspirators, one at a time, into a stateroom, gagged and bound them, and forced a confession out of them at the point of their knives. This soon brought a respite, when taken before the commanding officer, it was soon made plain the animus that lay behind the charge. When the ship got into New York the rascals could not be found.

F. M. SHAW.

La Ballona vs. San Diego.

(Los Angeles Commercial Bulletin.)

San Diego is making strenuous efforts to induce the Australian mail steamers to make its beautiful bay their objective point, and Spreckels, the sugar king, has donated his thinking-cap and is deep in cogitation as to the advisability of establishing a sugar refinery at that much-favored spot. Los Angeles meanwhile is looking on with a degree of apathy that is in keeping with her usual method of doing business where improvements are most needed to add to her importance. La Ballona has every advantage that a good harbor needs, except depth of water, to remedy this defect one solitary dredge has been sent down from San Francisco to do the immense amount of work necessary to give the slough sufficient depth to harbor steamers of the largest size. While this dredge is working its solitary way amongst the mud and slime, Spreckels will have established his refinery and will be supplying this whole country with its products, the mail steamers will have learned the way into San Diego Bay, and Los Angeles will be behind the door kicking herself because she did not order two or three more dredges and thus secure for herself these great advantages. San Diego said to have a real-estate craze; that may all be, but it is evident that there is "method in her madness" she does not lose sight of many chances for her advancement. Los Angeles merchants say: "Let San Diego have her steamships, let all the imports come through San Diego, she will only be the port of entry for Los Angeles." They don't look at it the way other people may regard it. A great many large importers may say to themselves: "San Diego is a growing city; it has equal railroad facilities with Los Angeles; why not make it our distributive center and save freight to Los Angeles?" This matter should be considered carefully. If La Ballona is to be a practical success, and we see no reason why it should not be, it is of vital importance that the work should be done as fast as men and machinery can do it. If ten dredges can be used to advantage, procure them and set them to work; it will be expensive, no doubt, but delay will be more so. La Ballona, completed, will offer fully as many inducements as does San Diego bay, and will be more directly on the main line East. Los Angeles has every advantage in her favor now over San Diego, but so had St. Louis over Kansas City a few years ago, and now the streets of St. Louis are compared with the latter city like a deserted mining camp. This change was brought about by wide-awake, pushing mercantile population, who made the most of every hold they got. Los Angeles, look to your laurels; don't let San Diego snatch them from your brow.

Read This Today.

If you wish a chance to grow rich, listen. You can have a fine 45-acre tract on the corner of Washington street and Wolfskill avenue, with splendid improvements, being one of the finest places in this city. It is suitable to subdivide at high prices and is an opportunity seldom offered, as the buyer will make from \$20,000 to \$40,000 profit. Chas. Victor Hall, room 5, 41 South Spring street.

Hotel Men

Should note the fact that the new hotel at Magnolia, or North Ontario, can be purchased now for the cost of the building, \$20,000, on terms, and a whole block of ground, worth \$10,000 will be thrown in. No such opportunity as this has been offered for five days only. Address, J. A. Merrill, telephone 25, San Bernardino, Cal.

A Good Idea.

As you enter Day, Hinton & Mathes' spacious office, No. 8 North Spring street, this morning, you will see on the wall in bold characters a decoration signed by the Title and Abstract Insurance Company, of Los Angeles, that the title to the Central Park tract is perfect.

The Los Angeles and Vernon-Street Railway Company are negotiating by telegraph for street rails for the road to Central Park. The line will be made this week, and a first consideration will be prompt delivery, as it is intended that the road shall be completed without any avoidable delay.

Contractor Burlingame will begin work on the levee in front of the Clement tract early next week. Then the lots will take a jump. Secure one today or you will get left. They are cheaper now than other tracts mile further from the city center. Day, Hinton & Mathes, 8 North Spring street.

Florence to the Front.

Five and ten-acre property here, the choicest in this county, for one-fourth cash, one-fourth in 6 months, and balance in a year; improved property near the station. For acre property see Charles Victor Hall, 41 South Spring street.

Real Estate—Lankershim Ranch.

12,000 —:- ACRES —:- 12,000

In the Lankershim Ranch, Only Eight Miles from the City Limits,

THE CREAM OF THE SAN FERNANDO VALLEY LANDS!

ABUNDANT WATER

A syndicate of well-known capitalists having purchased 12,000 acres of the best land in the famous Lanker-
shim Ranch, are about to form a company to subdivide and sell this choice land. The land will cost purchasers
of stock only \$65 per acre, which is less than half the price of other lands of the same quality in that locality.
We know of no better opportunity to double an investment in a short time. This land joins the Providencia
Rancho, where land is selling at \$200 per acre. The company will be organized with a capital of \$780,000,
divided into 7800 shares of a par value of \$100 each. Only a limited amount of the stock will be sold.
The stock will be sold on the following easy terms: 15 per cent. cash, 25 per cent. September 10, 1887,
30 per cent. July 1, 1888; interest 5 per cent. per annum; 30 per cent. July 1, 1889; interest 5 per cent. per annum
On these terms any one can afford to buy stock. The sale of stock will begin on Tuesday, August
2d. All who wish to subscribe should apply at once, as it will be taken up rapidly.

—A LEADING FEATURE IN THIS ENTERPRISE IS THAT—

Subscribers will be Allowed to Take Land at an Appraised Value by Surrendering Stock,

UNDER AN ARRANGEMENT TO BE MADE BY THE DIRECTORS.

BYRAM & POINDEXTER, 27 West First Street, :- or :- BURCH & BOAL, 136 West First Street.

—OR INFORMATION CAN BE HAD FROM—

Real Estate—Fulton Wells.

Fulton Wells No Longer, but Now

SANTA FE SPRINGS!

The Atchison, Topeka and Santa Fe having purchased the old Fulton Wells property, have added it to
their own townsite and have changed the name to that of their matchless railway system, and call the coming
city SANTA FE SPRINGS. The plans for their \$60,000 hotel have been completed and the building, in
the center of a magnificent park, laid out in walks and drives, will be begun at once. The undersigned
wishes to give notice that only a few of the 96 lots in the very heart of this town are left, and next week
the prices will be advanced 25 per cent. The prices now range from \$250 to \$450. Terms: One-third down,
balance six and twelve months. If you want a safe investment, insuring a large and speedy return on amount
invested, don't hesitate, but call today on
